

“National Education Policy will set the foundation for 21st century India. We’ve given extra impetus to this national policy for ensuring that it makes Indians more empowered and easily attractive to opportunities. We’re moving to an era where an individual will not be stuck to a single profession all his life. Thus, he will continuously need to re-skill and up-skill himself. We have kept this in contention while formulating the National Education Policy.”

- Hon’ble Prime Minister, **Shri Narendra Modi Ji**
